SUMMARY

I am a dedicated software developer with extensive experience in Ruby on Rails, specializing in building efficient and scalable applications. My journey in the tech industry has honed my skills in API development and team leadership. I excel at mentoring junior developers and implementing best practices to ensure quality code. My passion for technology drives me to tackle complex challenges with innovative solutions

EXPERIENCE

Lead Software Developer (Ruby on Rails Developer)

Mahindra Logistics

📅 01/2024 - Present 📍 Mumbai

Integrated Logistics Solutions

- Led the development and integration of RESTful APIs for Transport Management Systems, enhancing cross-functional efficiency
- Optimized backend architecture to improve performance and scalability
- Led a team of 3 developers, providing mentorship, conducting code reviews, and ensuring alignment with business and technical standards
- Enhanced Multi-Factor Authentication (MFA) for secure user sign-in
- Part of the upgrade the Rails 3 Project to the Rails 5

Lead Software Developer (Ruby on Rails Developer)

TrueEquation Pvt Ltd

📅 08/2023 - 12/2023 📍 Hyderabad

Contract

- Integrated external shipping services (Bluedart, XpressBees)
- Supervised and mentored junior developers, fostering team growth and improving code quality
- Refactored application code to improve performance, maintainability, and scalability
- Implemented Active Admin for streamlined admin panel management

Senior Software Developer (Ruby on Rails Developer)

Thinkbiz Pvt Ltd

📅 11/2021 - 07/2023 📍 Ahmedabad

- Involved in API collaboration and back-end development
- Created reusable code to reduce costs
- Tested links to identify and fix errors, and evaluate traffic and speed
- Collaborated with various testing frameworks, tools, content management systems, and cross-functional teams
- Developed a Microsoft Teams application
- Gained knowledge of Node.js
- Participated in Agile/Scrum development methods, including sprint planning, daily stand-ups, and retrospectives
- Worked with developers, designers, and project managers to determine project scope and requirements
- Mentored new software developers, providing guidance on Ruby on Rails development methods and best practices
- Implemented new features and enhancements to existing applications based on client requirements
- Explored CI/CD implementation
- Implement the swagger for the documentation of the APIs

KEY ACHIEVEMENTS

Enhanced Team Productivity

Increased team productivity by 20% through improved workflows and mentorship programs.

Optimized Backend Performance

Reduced API response time by 30% through architectural optimizations.

Successful Project Management

Oversaw 5 successful project launches, generating over \$500,000 in revenue.

Cost Saving Integrations

Implemented API integrations saving 15% in operational costs.

SKILLS

Agile	Ajax	AWS	Bootstrap
CSS	ECommerce	Git	GitHub
Heroku	HTML	JavaScript	jQuery
Linux	Microsoft Power Point	OOP	
PostgreSQL	Rails	React	REST
RSpec	Ruby	Sidekiq	Swagger
Node.js	GraphQL	BitBucket	
Gmail	Ruby on Rails	SQLite	

PROJECTS

Transport Management System

Transport Management System

- A comprehensive transport management system designed to optimize logistics operations, improve supply chain visibility, and ensure real-time tracking of shipments
- Key features include real-time GPS tracking for freight movement, automated dispatch and route optimization, integration with third-party logistics providers, and detailed analytics and reporting

Leber

- A comprehensive website designed for hospitals and schools to help students and patients monitor their stress levels and COVID-19 status
- Includes interactive features and user-friendly interfaces to ensure that users can easily input their data and receive accurate results

EXPERIENCE

Junior Software Developer (Ruby on Rails Developer)

Compiltech Pvt Ltd

📅 03/2020 - 10/2021 📍 Ahmedabad

- Strong understanding of design patterns and principles in object-oriented programming (OOP)
- Complete understanding of front-end technologies like JavaScript, HTML, CSS, and jQuery
- Experience with databases like MySQL and PostgreSQL
- Skilled in collaborative platforms like GitHub and Bitbucket, and version control systems like Git
- Handled special projects designated by senior developers

EDUCATION

B.E

Nagpur Institute of Technology Nagpur

📅 08/2015 - 06/2019 📍 Nagpur

LANGUAGES

Language

PROJECTS

Teams Bot Development

- A sophisticated application developed using Node.js and Ruby on Rails, leveraging the Microsoft Teams toolkit extension
- Provides various functionalities within Microsoft Teams, such as automating tasks, responding to user queries, and integrating with other services and applications

SmartFlow

- A versatile to-do task management website tailored for employees who travel for project meetings
- Allows users to create and manage tasks, set deadlines, and track progress

RIGHT-ON

- An e-commerce platform for online shopping in Japan, focusing on clothing and accessories
- Offers a wide range of products, detailed descriptions, and a seamless shopping experience

INVOEASE

- A US-based website designed for purchasing printing products
- Allows users to browse products, place orders, and make payments using debit, credit, and bank-to-bank transfers

VIRTUAL INSURANCE TOOLS

- A specialized tool developed for insurance companies to manage their policies and agents
- Enables insurance companies to register and provide login credentials to agents
